

WHO WE ARE AND WHAT WE DO

Established in 2004, Globewerks is a professional conference organizer (PCO) that specialises in the organisation of professional conferences and corporate meetings, and provides our clients with professional event management service, consultation and execution. A member of the Singapore Association of Conventions and Exhibition Organisers (SACEOS), we offer our clients a full suite of PCO services from bid management, registration, abstracts review / management to sponsorship sales and management.

As PCO, we support organizing committees of conferences in all aspects of planning and managing their events. When planning a conference, we work with organisers to help develop budgets, to ensure that they are controlled and to chart a time linked project plan to ensure a systematic approach to the whole conference. Whether planning a seminar for 50 participants or a congress for 3,000 delegates, every detail must be scrutinized, nothing can be left to chance. No two conferences are the same; each one is unique in its requirements and delivery - requiring the highest levels of skills in management, marketing, negotiations, budgeting, communications and execution. We are a team of dedicated professionals and specialists in each of these areas to manage these complexities for our clients.

OUR UNIQUENESS

Each conference is managed by a Globewerks conference director, who will be supported by his/her team of conference support staff. We therefore become an extension of our clients' committee. Our services can be customized to suit the event's needs. We can organize the entire event, or we can assist with certain components – wherever and whenever needed.

No stones are left unturned, every possibility is considered. With this attitude, everything is do-able, nothing is impossible! Work with us, let us be a part of your team.

We are passionate about delivering a job well-done. Our dedication and commitment ensure that each project is executed to the highest level.
